Help Us Build Real-World Knowledge About How Medicinal Cannabis Affects Health and Wellbeing

The Lumir Mission Study, being run in Australia, the United States, and United Kingdom, is a world-first, and aims to understand patient experiences with different types of medicinal cannabis products, and what characteristics of medicinal cannabis products (type, strength, etc.) are associated with better outcomes for a range of medical conditions and associated symptoms.

The study is open to anyone aged 18 years or over who is using medicinal cannabis products prescribed by a doctor or nurse practitioner for any health condition or symptom management. If you are new to medicinal cannabis, or 'cannabis-curious', we can arrange a telehealth appointment with one of our experienced Lumir Mission doctors who can guide you.

Participating in the study is easy, accessible, and rewarding!

As a thank you for completing a nine question survey each month, you will receive 10% off formulary medications, and a range of rewards such as wellness activities and resources. We will also keep you up to date on study findings.

Join the Lumir Mission Now!

Head to www.lumirmission.com and complete the pre-screening survey – it only takes 3 minutes! You can also contact the Lumir Mission team at hello@lumirmission.com, or on **1300 378 942**.
